This flow shows the starting point for an end user adding a new EVE Account to the application.

Prerequisites:

- EVE account has been loaded (e.g. flow 1 run)

Expected results:

- The end user can swipe left and right to switch between displaying each category: Skills, Mails and Kills & Losses
- The end user can move up and down the list view browsing each skill, mail or kill & loss
- Tapping on a particular item in the list will show detailed view of the data (e.g. the mails body, date time etc)
